

■ Students of Aditya Biria World Academy, Tardeo, exchange potted plants during the 'Plant Exchange Program'.

Aditya Biria World Academy, Tardeo, organised a 'Plant Exchange Program', recently. The objective of the programme organised by the school's Green Cell was to sensitise the students towards the need to 'Go Green'. The programme, popularly known as 'PEP', was organised for the students of Classes 4 and 5. As part of the programme, every student got a small potted plant. They then exchanged their plant with another student and explained, in detail, the procedure to take care of the plant. The students also shared information such as the amount of water and sunlight needed by the plant while explaining the kind of environment that would be conducive for their plant to grow well. "Based on the concept of 'Care for My Pet', this activity has brought the students closer to nature. It has motivated them to observe it closely and taught them to value and respect it," said a teacher.
